

Smart Ring[™]

What is it?

With Smart Ring you can identify who is calling before you answer by creating 'Smart Ring Lists'. It allows you to allocate up to three different ring sounds (in addition to your standard one) to up to 15 different people per ring sound.

For example, you might allocate one ring sound to your friends' phone numbers, one to your relatives' phone numbers and one to your work phone numbers. If the incoming call is not in your Smart Ring Lists, you will hear your standard ring sound.

To connect this service call Telstra on 13 2200.

How do I use it?

To turn Smart Ring on

To turn Smart Ring off

To find out if Smart Ring is on or off

To add/change a number on a 'Smart Ring List'

To remove a number from a 'Smart Ring List'

To remove all numbers from a 'Smart Ring List'

To check which number is in a particular position in a 'Smart Ring List'

Anything else I need to know?

Available on most tone phones except for some cordless phones.

If you want to identify calls from a certain area, just enter the area code.
